

## Drilling on dimensions

### Procedure

1. Start the transaction using the menu path or transaction code.

### Internal

The screenshot shows the Business Objects InfoView web application running in a Microsoft Internet Explorer browser. The browser window title is 'InfoView - Microsoft Internet Explorer'. The address bar shows the URL: <http://ltd:8080/InfoViewApp/listing/main.do?appKind=InfoView&service=%2FInfoViewApp%2Fcommon%2FappService.do>. The application header displays 'BUSINESSOBJECTS INFOVIEW' and 'Welcome: user'. The main content area shows a report titled 'Sales Revenue' under the 'Web Intelligence - drilling on dimensions' section. The report is divided into two sections: 'California' and 'Colorado'. Each section contains a table with data for the years 2004, 2005, and 2006, along with summary rows for 'Sum' and 'Average'.

California	
2004	\$1,704,211
2005	\$2,782,680
2006	\$2,992,679
Sum:	\$7,479,569
Average:	\$2,493,190

Colorado	
2004	\$448,301
2005	\$768,390
2006	\$843,584
Sum:	\$2,060,275

The browser window also shows a 'Report 1' button and a 'Discussions' section at the bottom.

2. Click the link labeled **2004**.

You can drill on dimension values in tables, section cells, and charts on a report. In this step you drill on a table.

Here you want to see details for the year 2004.

## Drilling on dimensions

---

3. Click **Drill Up** .

Now you want to display the yearly aggregate results again.

4. Click the link labeled **California**.

Here you drill on a section cell.

5. Click **Drill Up** .

Now drill back up to the State level to see results for all states again.

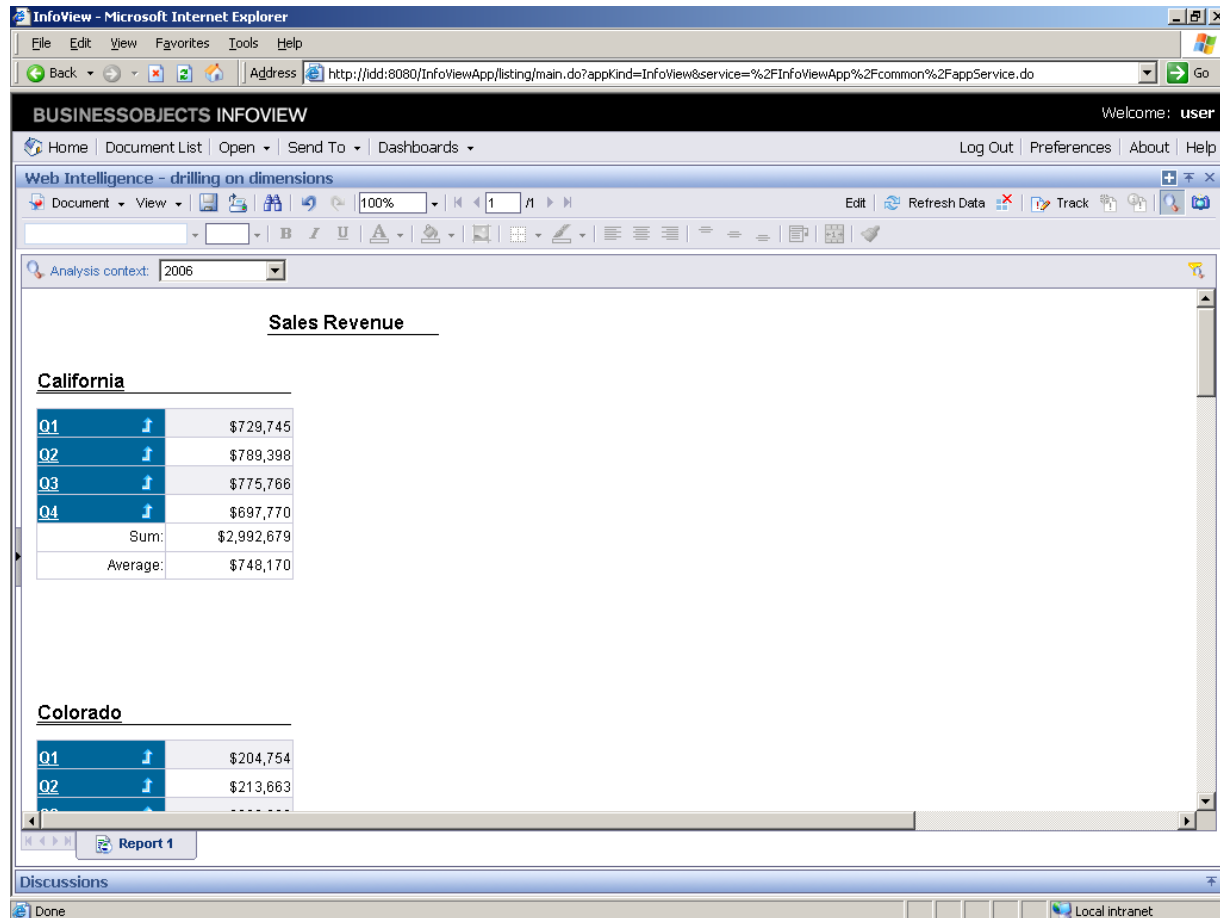

6. Click the link labeled **2006**.

Sales Revenue is calculated based on the values to which you drill.

7. Start the transaction using the menu path or transaction code.
